Personal Letter

After leaving my home country 4 years ago I decided to change my life and learn IT, something I was always good at, but until that time I had never seen myself as a Developer. My past work experience is not related to the IT job I'm looking for, but I hope it shows that I have wide experience in many fields, which proves my adaptability skill is well matured. I always want to learn more and improve as much as possible.

Work experience

2019: Construction worker at CPH Mandskab. (Copenhagen, Denmark)

2018: Servicekraft at MaLoa restaurant in Berlin, Germany. I was in charge of customer service and logistics.

2018: General maintenance technician at Huba Huba beach bungalows and restaurant. I also improved plumbing system, repaired damaged buildings and we built five new bungalows (Koh Rong Samloem Island, Cambodia).

2017: Hostel front of desk at Samsen 360 Hostel in the central area of Bangkok for 12 months. I was in charge of organizing the database, administrating websites with PMS technology. (Bangkok, Thailand)

2014: Team leader in network marketing business for 12 months. Multi-level sales, training of sales agents in coaching, communication skills, and persuading customer to acquire products. (Buenos Aires, Argentina)
